Applicant's election with traverse of Group I, claims 1-33, 68-78, in the reply filed on 10/18/04 is acknowledged. The traversal is on the ground(s) that the Office has failed to show that the method of Group III could be performed by hand without the kit of Group II. This is not found persuasive because methods may be practiced with or without kits.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-33, 68-78 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The core compound of formula XII is old. A preliminary search revealed too many citations to present here that read on the compounds as claimed. On page 19 of the present specification, formula XII is shown where R11, R14 or R15 is a cleavable protecting group and the structure is a protecting group on the carbonyl of a coelenterazine. A search reveals no references teach or fairly suggest the presently claimed core compound with one or more coelenterazine moieties. However, as claimed, R11, R14, or R15 can be anything except not all can be acetyl groups. Such compounds would not function as described and are old.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-33, 68-78 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Each of the following applies in all occurrences.

In claim 1 "enzyme-removable groups" is indefinite as it could read on H or a methyl group or most anything. This is so indefinite as to be unsearchable. Claim 3 fails to further limit claim 1 because the stated R groups are attached to O. In claim 6 F12 appears to be a trademarked name which is improper in claims. Claim 33 describes a compound in functional terms where one would not know the metes and bounds of the claim.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Brynaert (WO 01/87853 A1) teaches compounds encompassed by the present claims.
